

A Leading Edge Student Job Application Service

Helping Students, Graduates, and Alumni members find opportunities by opening new doors and connecting them directly to the right organizations

About Us

Weapply4u was founded by a creative sales/marketing executive of a Fortune 500 company specializing in Business and Client Development. His decades of experience in sales and marketing enabled him to focus on how people could find jobs faster and get hired sooner. He created a process by which New Graduates and Summer students looking for some experience could tap into the hidden job market.

Where does the job hunt begin? In school. The intention was to create a tool that allows students to find full time, internship positions and summer jobs in their field faster in order to get them the experience sooner. Job Boards/Sites like Monster, Workopolis, CareerBuilder, etc. are great tools for people who have experience. Most agencies and recruiters who post jobs are looking for specific people with the right experience to match their client's needs.

It took this team 6 years to strategize the needs of people, the system and approach, the contacts, and hence this service.

The key to searching for that right job is understanding how to open new doors for yourself and how to get access to that "Hidden" market. It is known to all, that a large percentage (some say upto 90%) of opportunities are not published. Companies won't spend money advertising for new graduates, internships and summer jobs. They rely on word of mouth, internal and direct applications.

Our approach allows us to apply directly to hiring managers for various mid-sized to large organizations on behalf of you. We apply directly to complete Job Sectors and Industries who would appreciate your educational background, your goals, and passion even though you have limited experience. In essence, our goal is to open doors for job seekers who had no access to in the first place. Companies are always looking even when they are not hiring. We want you to have the opportunity to connect and have a great chance at being considered.

Now with thousands of satisfied students--our clients, Weapply4u.com has become a major source for job seekers across Colleges and Universities. Our students are paying anywhere between \$20,000 to \$70,000 on their education, so isn't investing 0.1% of that towards finding you a job that might pay you forever worth the investment?

Please note: We are not an Agency. We are a Marketing Company looking to add value to your job search. We offer our time, services and resources as a tool to get you a job faster. Hence we charge a nominal fee just for the time it takes us to apply on your behalf. We are a performance based marketing service and you only pay almost 80% of our fee only if you succeed.

How to get Started?

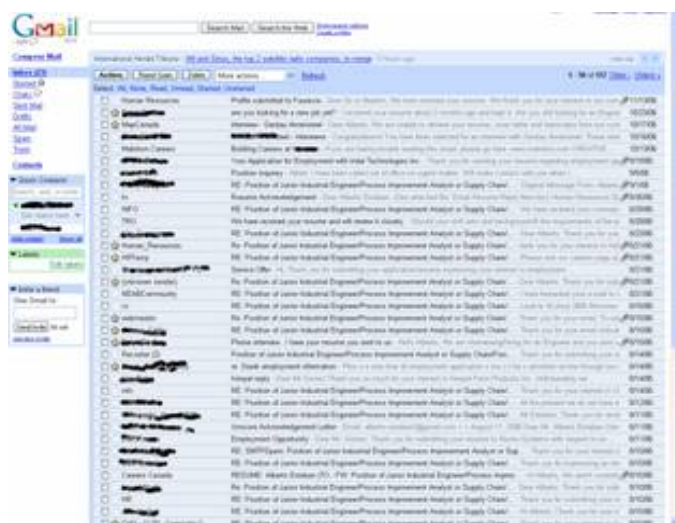

We offer a unique marketing experience where people can market themselves to 1000, 2000 or 3000 companies in their field immediately. I imagine contacting 3000 companies in 4-5 days! If you try this yourself it will probably take you over 4-5 months of full time work and that is if you have the special lists that we have.

How do we get started?

1. Register online at Weapply4u.com and indicate the industry and locations of interest. Please select the industry that best suits your education and experience. If you are unsure of the packages and need advice or see an industry that is not there email us at contact@weapply4u.com
2. We also offer International packages, so indicate US, Canada and/or EU.
3. We offer two packages for sending out your applications depending on how aggressive you are looking to get:
 - i) 1000 resumes/cover letters
 - ii) 2000 resumes/cover letters
4. Upon completion of registration, You will get instructions on how to send submit your current resume and cover letter in Word format for our team to review. We want to market and present your skills and education in strategic way to potential employers. We will review your resume and make recommendations on how you can improve it. We will send you sample resume's if we feel your resume needs work. After registration is complete you will get instructions to create a new joint email account. We will use this email address to personally send out your applications on your behalf. That will be a joint account that we both will have access to.
5. After your final resume/cover letter is submitted we will start the application process. All responses from potential employers will come directly back to you. Should they have open positions that match your skill set and experience then all communications and interviews are set up directly between you and the employer.

Within 4-5 days after submitting your final resume/cover letter, we advertise your skills by sending your resume and cover letter (customizing the company name and address for each application) to a minimum of 1000 or 20000 companies.

This is how your email looks like after the application process is finished.

Benefits to you— The Job Seeker

Do you think marketing yourself aggressively in this economic state would be a sound decision? As a job seeker, do you think sending out 1000 or 3000 applications to companies in your industry or field of work by the end of this week will increase your chances of getting employment? YES.

Our service is a marketing platform that enables thousands of organizations in your field to get your application directly from you. This allows decision makers to view your profile directly and not through the eyes of HR Managers and various Recruiters. In this market, the challenge is to find companies that are hiring. Our goal is to get you in front and be considered for those positions. Getting in front of the hiring manager first and fast is the key to opening the door to new employers.

Why should you use our service ?

Things are always changing within mid-sized to large companies. Positions change and people change. This market is a revolving door. We are able to tap into hundreds of companies that do not use Search Engines or Recruiters.
- **ACCESS MID SIZED AND SMALLER COMPANIES** : Travel on any highway and you will see 1000's of companies with big offices. Can you see yourself working for some of them that apply to you? Most people do not realize but large companies are really 100's of small divisions that make independent decisions on hiring and hire locally. That is why we have such a great success rate because we directly apply to those divisions and open 1000's of new doors to you.
- **ACCESS INDUSTRYFOCUS™ DATABASE** : The key to our success lies around 9 years of research and networking in order to build a Superior Database of companies in each sector. These databases are continuously updated by various key team members. We not only apply to large companies but also to mid-sized and smaller companies where new jobs are being created. Not only do we apply to companies in your related field but also to adjacent companies that supply to that sector or industry. We want to open all doors and not miss out on any possible opportunities and potential
- **PAYBACK** : We are NOT an Agency, but a Marketing / Consulting Company. We work for you not the employer. So get noticed quickly. Timing is everything and getting a job in your field is "Priceless"!
